Preface

For the first time reader, it is recommended that you read through the entire report in its natural sequence:

- The official definition of the industry in the Introduction chapter sets the scope of the industry covered throughout the report.
- The Executive Summary provides an overview of the entire industry.
- The Income Statements chapter details financial statistics including revenue, compensation, cost of materials, gross profit and net income.
- The Balance Sheets chapter covers details on assets, liabilities, and equity. The assets section analyzes and compares cash, accounts receivable, inventories, and properties.
- The Capital Expenditures chapter covers spending on building and structure, machine and equipment, automobile, and computers, as well as related industry trends.
- The Product Market Size chapter details the product components and their revenues that make up this industry.
- The Cost Analysis chapter details upstream industries.
- The Price Analysis chapter covers industry pricing history, related price and consumer indices and detailed price distribution among all downstream industries.
- The Industry Foreign Trade chapter details import and export numbers and trading partners.
- The Industry Structure chapter details all aspects of labor compensation, establishments in all 50 states, and the value added portion of this industry.
- The Competitive Landscape chapter lists major players, their revenue ranges, and industry player concentration.
- Comprehensive Appendices cover all related knowledge and sources.

The Table of Contents lists all subsections of the described chapters in detail and each section can be reference individually at will.
